### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 9, page 41, line 20, " value of said resistive" has been changed to  
-- value of said second resistive --.

In claim 9, page 42, line 8, " said first error amplifier" has been changed to  
-- said second error amplifier --.

Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance: prior art, U.S. Patent # 6,822,511 B1 does not teach nor render obvious a high frequency power amplifier electric part that has, in combination with other limitations, a transistor for output level detection, which receives an input signal of a transistor for amplification in the final stage of the power amplification circuit; and a bias generating circuit for applying a bias to said power amplification circuit in accordance with current of the transistor for output level detection, a current-voltage converting means converting current detected by said transistor for output level detection into a voltage; and an error amplifier for outputting voltage according to a potential difference between the voltage converted by the current-voltage converting means and voltage instructing an output

level from the outside, an output of said error amplifier is fed back to an input side of said transistor for amplification in the final stage.

. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents # 6,822,511 B1, # 6,753,735 B2, # 5,442,322, # 5,942,946, and # 2002/0146993 A1 contain some limitations of the claimed invention.
